SUMMARY

Business & Data Analyst with experience in operational analytics, enterprise application support, dashboard reporting, and AI-driven problem solving. Skilled in KPI monitoring, business process analysis, troubleshooting, and data-driven decision making within high-availability environments. Experienced in teaching and mentoring students in Natural Language Processing, Machine Learning, and Data Analytics through project-based learning, covering end-to-end AI workflows from data preprocessing and feature engineering to modeling and deployment. Passionate about transforming data into actionable insights and intelligent solutions to improve business performance and operational efficiency.

EXPERIENCE

STT Nurul Fikri | NLP & AI Lecturer

April 2026 – Present

- Guided Natural Language Processing course through hands-on, project-based learning
- Mentored 100+ students in developing end-to-end AI/NLP projects based on real-world business cases and practical AI implementation
- Mentored students in text preprocessing, EDA, feature extraction, word embeddings, and transformer-based NLP implementation using Hugging Face libraries
- Taught Machine Learning and Deep Learning approaches for NLP, including RNN, LSTM, and Transformer architectures
- Supervised multiple NLP projects including sentiment analysis, topic modeling, and text summarization to help students solve real-world business problems using AI.
- Assisted students in translating business problems into practical AI/NLP solutions through collaborative project development
- Developed learning materials, technical case studies, and project guidance for AI and NLP implementation

PT Pelindo Solusi Digital | Developer Engineer

November 2021 – April 2026

- Managed and maintained mission-critical enterprise applications at Pelindo, including SIMOP, ITOS, VMS, PRIMA, Pelindo-RKM, and Portaverse
- Resolved 80–90% of 50–60 daily operational tickets while consistently meeting SLA targets and maintaining operational system availability
- Delivered rapid troubleshooting, bug fixing, and production support, resolving standard operational issues within an average of 10–20 minutes
- Delivered 35+ system enhancements and bug fixes that improved application stability, operational workflow efficiency, and user experience
- Supported business monitoring and decision-making by delivering operational reporting, dashboard data, and database-driven analysis using SQL and Power BI.
- Integrated operational data between PRIMA and Pelindo-RKM systems to support risk management reporting and business process alignment

- Supported business monitoring and decision-making through operational reporting, dashboard analysis, and enterprise data support
- Maintained high system availability and operational continuity across enterprise-scale operational systems

PT.Timoda Laksmindo Perkasa | IT Engineer

June 2021 – August 2021

- Supported deployment of integrated smart security infrastructure that improved operational monitoring, access control, and system reliability for the Wisma Atlet Mandala Jayapura project
- Assisted in network infrastructure setup and configuration, including MikroTik routers, switches, LAN cabling, and network software deployment
- Implemented and configured 2 Automatic Number Plate Recognition (ANPR) systems to support smart access and vehicle monitoring
- Supervised installation and configuration of 30 RFID Door Access Systems, 2 Touchless Elevator Button Systems, 50 CCTV Cameras, and 4 PTZ Cameras
- Performed troubleshooting, system testing, and operational issue resolution to ensure stable deployment and reliable system performance
- Coordinated with technical teams to maintain network connectivity, device integration, and operational system reliability
- Contributed to improving operational security, monitoring, and access control systems through technology integration and infrastructure support
- Strengthened analytical and problem-solving skills through hands-on experience in infrastructure deployment, operational support, and system integration

STT Terpadu Nurul Fikri | Programming & Web Development Laboratory Assistant

September 2018 – August 2021

- Assisted lecturers in teaching Basic Programming, Data Structures, Database Design & Programming, and Web Programming (Basic & Advanced)
- Mentored 150+ students through hands-on programming and project-based learning sessions
- Guided students in programming fundamentals using C++, database design and SQL using MySQL and Oracle Database, as well as web development using HTML, CSS, JavaScript, PHP, and CodeIgniter
- Supported students in implementing algorithms, data structures, database systems, and web applications through practical exercises and projects
- Developed learning materials, programming exercises, online learning videos, and technical guidance to support classroom and remote learning activities
- Collaborated with lecturers and academic teams to prepare learning modules, assignments, and technical mentoring sessions

Google Developer Student Clubs | Core Team (Developer Relations)

October 2020 – August 2021

- Developed workshop curricula, technical learning materials, and educational content for community training sessions
- Created technical documentation and guidance to support knowledge sharing and member learning activities
- Assisted in organizing and managing technology workshops, community events, and developer learning programs
- Supported community engagement initiatives related to software development, programming, and technology trends
- Collaborated with cross-functional teams to deliver interactive and educational programs that improved both technical and soft skills of community members

STT Terpadu Nurul Fikri | Web Developer

October 2020 – January 2021

- Developed a Laboratory Assistant Management System that improved assistant scheduling, administrative workflows, and operational data management
- Built and maintained the web application using Laravel and MySQL
- Designed and implemented features for assistant management, scheduling, and administrative workflows
- Developed frontend and backend functionalities to improve operational efficiency, data processing, and system usability
- Implemented responsive user interfaces and integrated database systems to enhance user experience and application performance
- Collaborated with internal teams to gather requirements, support system development, and ensure application functionality.

Nurul Fikri Computer | Robotics and IoT Researcher

September 2019 – April 2020

- Assisted in robotics and Internet of Things research activities focused on educational and practical learning implementations
- Developed robotics and IoT learning modules for students and beginner learners using Arduino and mBlock
- Worked with various IoT sensors and components including distance sensors, temperature sensors, alarm modules, and buzzer/signal systems for automation projects
- Supported hands-on robotics and IoT projects involving sensor integration, device programming, and basic automation concepts
- Organized workshops and training sessions for elementary school teachers on introducing robotics and IoT programming for children
- Designed interactive and engaging learning experiences to improve technology literacy and practical problem-solving skills for young learners

SKILLS

- **Programming & Database:**
Python, PHP, SQL, MySQL, Oracle Database, REST API
- **Data Analytics & Visualization:**
Microsoft Power BI, Looker Studio, KPI Monitoring, Dashboard Reporting, Data Visualization, Exploratory Data Analysis (EDA).
- **Machine Learning & AI:**
Scikit-learn, TensorFlow, PyTorch, Machine Learning, Deep Learning, Predictive Analytics. □ Hugging Face, Docker, Git.
- **Natural Language Processing:**
Natural Language Processing, Sentiment Analysis, Text Pre-Processing, Text Classification, RNN/LSTM, Transformer Models, Feature Engineering

EDUCATION

- Budi Luhur University - Master of Computer Science, 2023 – 2025 (GPA: 3.93 / 4.00)
- STT Terpadu Nurul Fikri - Bachelor of Informatics Engineering, 2017 – 2021 (GPA: 3.89 / 4.00)
